INTRODUCTION

Welcome to our Newest Handbook of Lubrication:

In the Automotive Industry, where new technological advances are being incorporated by the day, we at **Repsol YPF Lubricantes y Especialidades** are working to develop a **wide range of Lubricants**.

For this purpose we are applying our **best efforts** in terms of resources, research and technology.

Throughout the entire process of production for our lubricants -from design to manufacture- we work to meet the top specifications and **the most stringent standards of quality**.

This is the only way to assure that engines and transmissions of those users who choose Repsol for their vehicles will be **perfectly well-lubricated**.

We are certain that this is the best possible investment that can be made to better an engine's life and are therefore proud to offer Lubricants providing all of the qualities required for cutting-edge engines and transmissions for safeguarding engines, boosting their functions, enhancing their performance and lengthening their useful life.

We have shown this to be true to date and shall continue to do so in the future, both on a day-to-day basis and at major auto racing competitions, which are our best test benches.

For more information, visit our "**Lubricant finder**" at [repsol.com](https://www.repsol.com)

User

INSTRUCTIONS

Model Year:

1988-1994: valid for models built between 1988 and 1994.

1988- : valid for models built from 1994 onwards.

Engine:

Engine«s gear housing capacity:

4,5/7 means: 4,5 or 7 litres;

4,5-7 means: from 4,5 to 7 litres.

Drain the existing lubricante completely when replacing it.

The recommendations that compose this handbook do not apply to vehicles with commercialization dates later than its edition date.

The information contained in this handbook is merely indicative and does not exempt the reading of the vehicle«s manual.
